External Auxiliary Switches

ASC77.1E ASC77.2E

Auxiliary switches designed for use with all rotary version types of GCA, GBB, GIB, GMA and GEB damper actuators.

- Prewired, complete with standard connecting cables of 0.9 m length, 3 x 0.75 mm² (ASC77.1E) or 6 x 0.75 mm² (ASC77.2E)
- Rated voltage AC 24...250 V / DC 12...30 V
- Switching points can be selected across the entire rotational angle range of 5...90 ° at increments of 5 °
- Switch position easy to read
- Current damper position indicated by position indicator

Use

The auxiliary switches are used to extend the scope of functions of all rotary version types of GCA, GBB, GIB, GMA and GEB damper actuators and to upgrade existing actuators that have no switching functions integrated.
